

We have already programmed your new wireless modem/router for you!

Attach the power adapter to the POWER slot on the back of the Actiontec.

Plug the modem/router into a power outlet and wait for a few minutes while it configures.

Fiber to the Home Customers:

- Connect from the grey WAN port on the Actiontec to the wall mounted Ethernet Jack with the Ethernet cable provided.
- Any computers that need to be hard wired will connect to any of the 4 Yellow LAN ports.
- **DO NOT CONNECT ANY COMPUTERS DIRECT TO THE WAN PORT ON THE ACTIONTEC.**

When connected properly the lights to Power, WAN Ethernet, Internet, wireless and any LAN port that is in use will be on and green.

Your Wireless Network's Name is: _____

Your Wireless Password is printed on a **label on the bottom of the router** and is all CAPITAL LETTERS. If you happen to reset your router this is also default wireless password is for the device.

- 1) **Phone Port** – This port is used to connect the telephone line for DSL Customers.
- 2) **Ethernet Ports** – These ports are used to connect non-wireless capable devices such as Desktop computers or Cell Phone signal boosters.
- 3) **WAN Port** – This port is used to connect to the Fiber (FTTH) box on the side of the house. This port is not used by DSL Customers.
- 4) **Power Adapter** – This port is used to connect the A/C Power Adapter included with this device.
