

## ***We have already programmed your new wireless modem/router for you!***

Attach the power adapter to the POWER slot on the back of the Pace.

Plug the modem/router into a power outlet and wait for a few minutes while it configures.

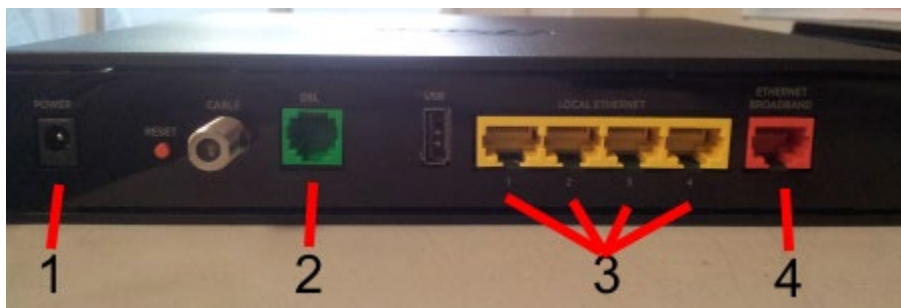

### **Fiber to the Home Customers:**

- Connect from the red Ethernet Broadband port on the Pace to the wall mounted Ethernet Jack with the Ethernet cable provided.
- Any computers that need to be hard wired will connect to any of the 4 Yellow LAN ports.
- **DO NOT CONNECT ANY COMPUTERS DIRECT TO THE ETHERNET BROADBAND PORT ON THE PACE.**

When connected properly the lights to Power, Broadband 1, Service, Wireless (If any wireless devices are currently connected to the Pace's wireless network) and any LAN port that is in use will be on and green.

Your Wireless Network's Name is: \_\_\_\_\_

Your Wireless Password is printed on a **label on the bottom of the router (it's called "Wi-Fi Key")**. If you happen to reset your router this is also default wireless password is for the device.

- 1) **Power Adapter** – This port is used to connect the A/C Power Adapter included with this device.
- 2) **Phone Port** – This will not be used for your high speed fiber to the home connection.
- 3) **Ethernet Ports** – These ports are used to connect non-wireless capable devices such as Desktop computers or Cell Phone signal boosters.
- 4) **Ethernet Broadband Port** – This port is used to connect to the Fiber (FTTH) box on the side of the house. This port is not used by DSL Customers.
