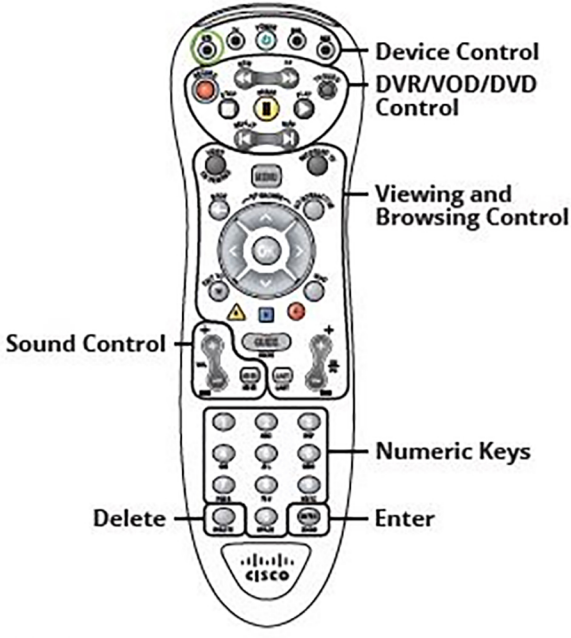
VTelevision Remote Guide

Technical Support:
(802) 885-9002 / (888) 242-7584

- If your remote isn't working, make sure it's set to control the set-top box (push the "STB" button at the top of the remote) and has fresh batteries.
- If you lose your TV signal, try rebooting your router.
- A "No Signal" message doesn't mean your signal is lost—it means you have selected the wrong input on your TV.
- For further VTelevision tips and frequently asked questions, see Page 10 in your GigE Home Welcome Booklet.



Device Control

Turns devices on or off

Enables VTelevision

Enables TV mode functions

Enables DVD mode functions
